

ELECTION OF SPECIES:

Applicants provisionally elect, with traverse, the species of invention characterized by the Examiner as Species I corresponding to Figs. 1-4 (embodiment 1), and submit that claims 1-2 are readable on the elected species.

REMARKS

In the last Action, restriction was required among five species. The Examiner stated that the five species are patentably distinct from each other, thereby making restriction proper. Applicants were required to elect one of the five species for further prosecution in this application and to list all claims readable on the elected species.

In response to the restriction requirement, applicants have provisionally elected the species of invention designated as Species I corresponding to Figs. 1-4 (embodiment 1) and list claims 1-2 as being readable on the elected species. The non-elected claims have been retained in the application pending possible withdrawal of the restriction requirement or allowance of a generic or sub-generic claim.

In light of the foregoing, early and favorable
action on the merits is respectfully requested.

Respectfully submitted,
